

Enterprise Search Assistant

Discover how real-time data retrieval from Outlook, SharePoint, Teams, DevOps, PowerBI and more can enhance the employee productivity.

30%

Average knowledge worker spends 30% of their time simply searching for information

Powered by Microsoft, Synoptix AI is a proven leader in enterprise AI with a complete technology stack designed to support your organisation's transformation.

Let us show you how Synoptix AI can power your AI journey with a comprehensive suite of tools and services.

Find & Understand Information

Find contextual and permission-aware information across different data sources in real-time.

Create & Summarise Content

Create, summarise, and analyse content, draft updates, condense information, and extract insights from large data.

Automate Repetitive Tasks

Communicate, automate, and orchestrate tasks to reduce manual effort and streamline workflows across teams and departments.

Whatever the strategic priority – cost optimization, customer service, or innovation – Synoptix AI converts AI potential into tangible, scalable outcomes.

Connect security to company data

Synoptix AI employs a zero-trust approach: every access request to databases, APIs, or data lakes is authenticated, authorised, and encrypted. Administrators define granular roles and permissions; all data access is logged in real time, enabling full traceability and compliance reporting.

Understand every dataset in context

Synoptix AI delivers context-aware responses that mirror how your teams actually work. Our platform doesn't just read documents, it interprets them, extracting relationships, intents, and hierarchies across formats like PDFs, emails, SharePoint files, and databases.

One centralised platform

One centralised platform that unifies enterprise search, intelligent agents, and workflow automation in a secure environment. Instead of juggling multiple tools or disconnected systems, teams can access information from one interface.

Enrich employee experience

Enhance productivity by providing real-time access to information. Synoptix AI allows employees to focus on more strategic tasks, boosting productivity and collaboration and fostering a more engaging and fulfilling work environment.

Synoptix AI enables real-time information retrieval to enhance decision-making and streamline operations, helping enterprises build intelligent knowledge across their digital ecosystem. With seamless integration across Outlook, SharePoint, Teams, and Power BI, and more, enterprises can unlock an end-to-end retrieval solution.

Reach out to unlock continuous enterprise value with AI.
