

# Trusted AI, Grounded In Your Enterprise Data

The ontology-based platform for building, governing and scaling agents on the data your business actually runs on. Without moving it.

## Ontology-Based Agentic AI Platform

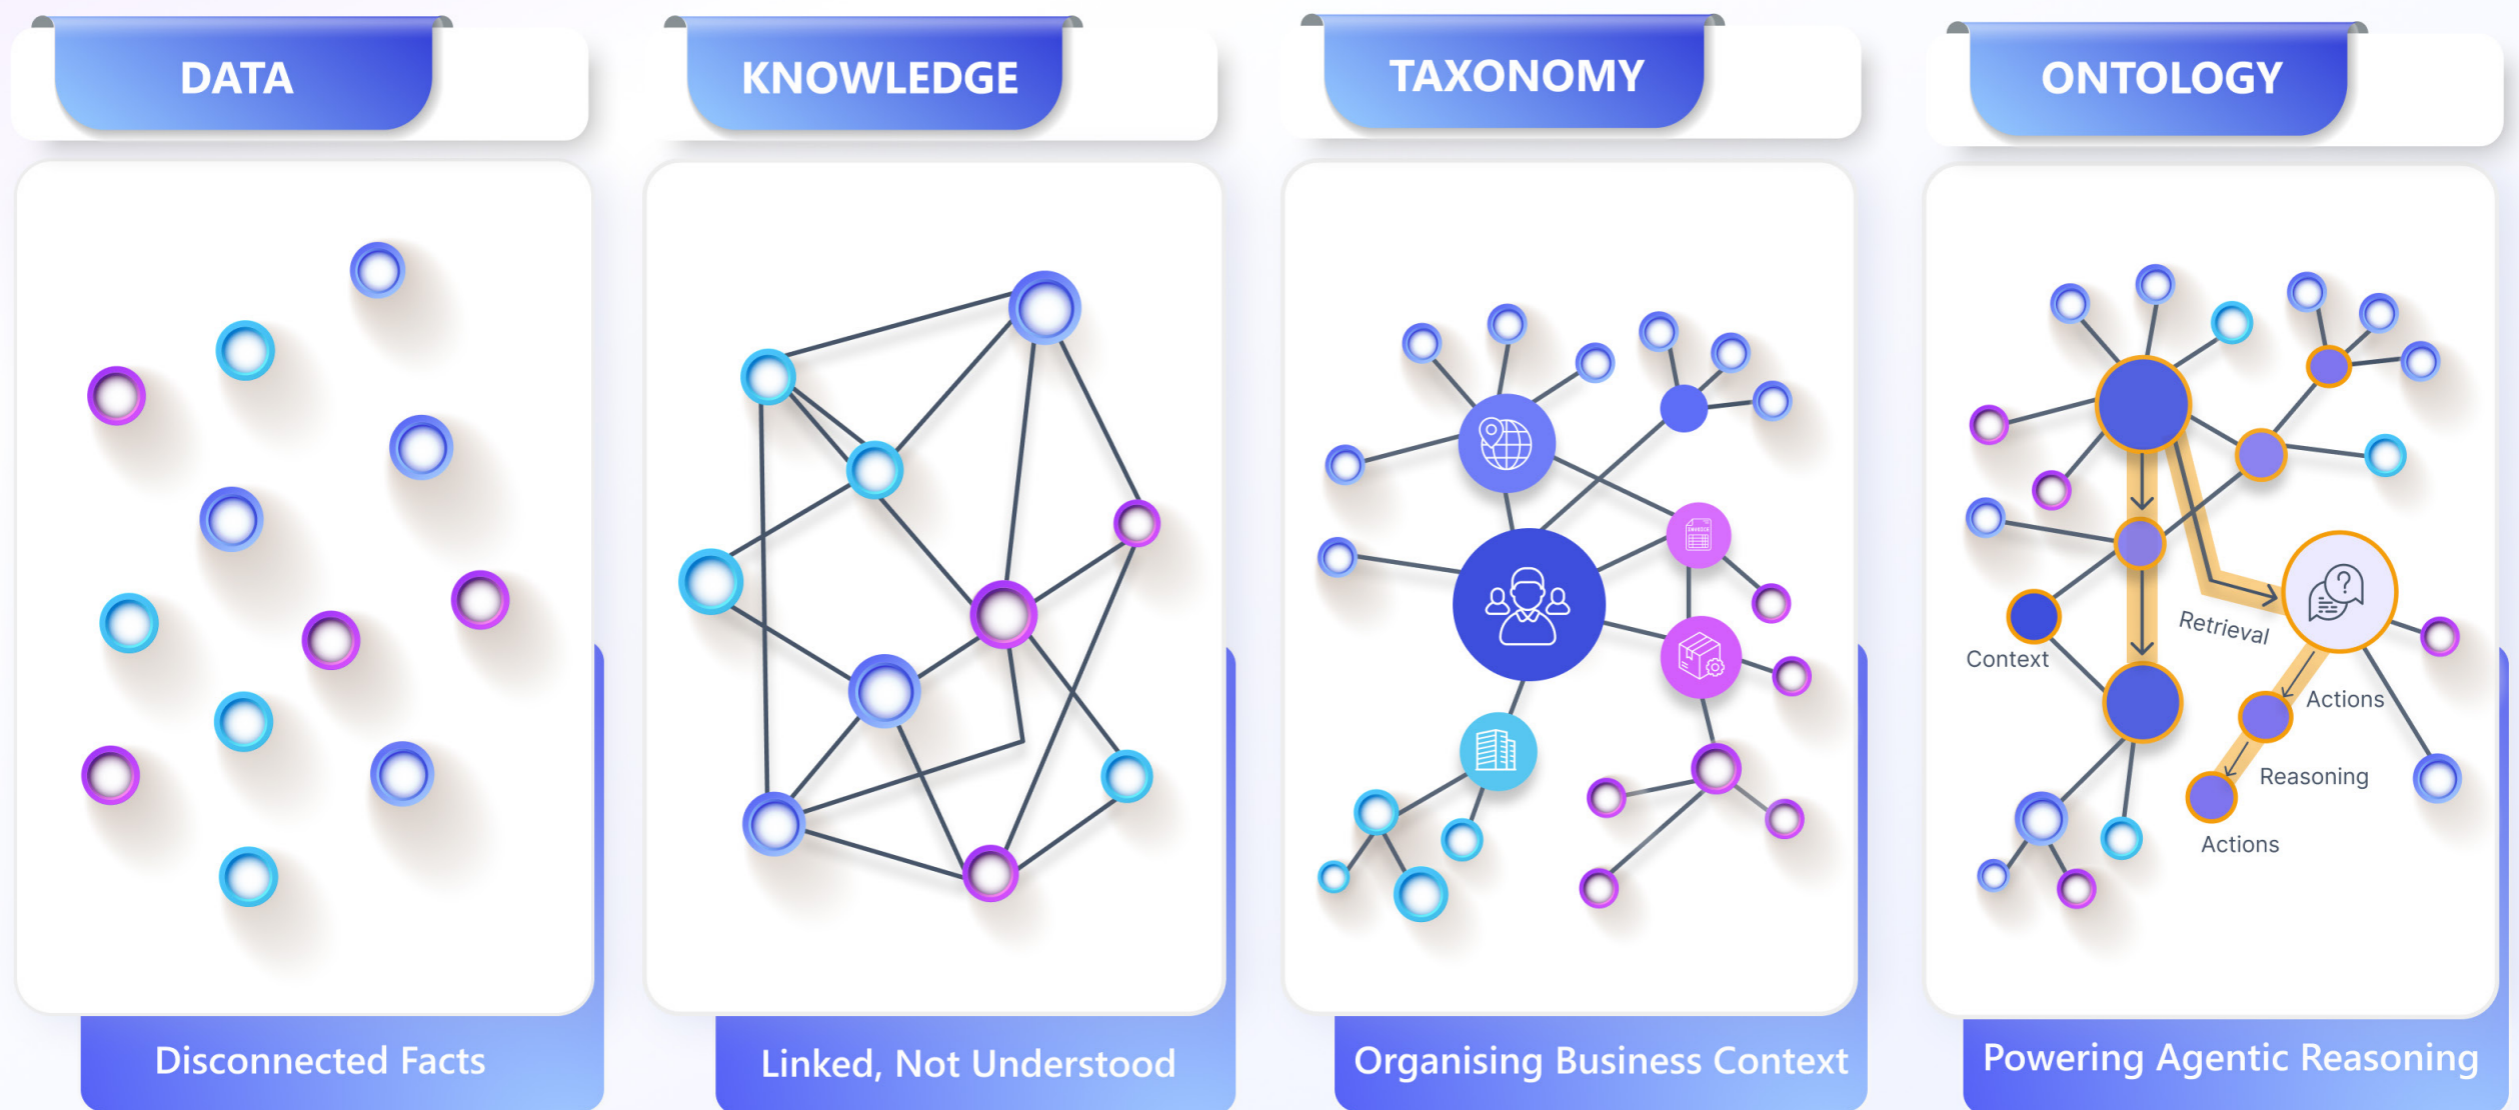

### Trusted Ecosystem & Industry Partners

# Elevating Raw Data into Autonomous Reasoning

Data stores information. Knowledge connects information. Ontology enables AI agents to reason, make decisions and safely automate work.

## The Sovereign Enterprise Advantage

### Unifies Your Ecosystem

Connects data, models and applications into one intelligent system.

### Accelerates AI Outcomes

Pre-built agents, ontologies and workflows to deliver value faster.

### Enterprise-Grade by Design

Built-in security, governance and compliance for regulated environments.

### Invest in What You Have

Works with your existing investments. No rip-and-replace.

### ZERO

#### Data Movement

Synoptix AI runs where your data lives. Zero ETL. Zero copies. Zero exfiltration risk.

### EVERY

#### Answer Grounded

Citations and lineage on every response. Synoptix AI retrieves from your governed data.

### BUILT-IN

#### Compliance

Row-level security, audit trail, IRAP and Essential 8 enforced at every query.

### WEEKS

#### To Production

Joint reference architectures & accelerators that reach production in weeks.

### ALWAYS

#### Evolving

New models, new data, new threats. Swap LLMs and retune agents without rebuilding.
